

SELF-SERVICE ANALYTICS

# Get the metrics you need, when you need them

**PERFORMANCE INSIGHTS AT YOUR FINGER TIPS**

**Identify Gaps in Capture**

HCC capture data, down to the provider level, helps you target education efforts.

**Target Resources Wisely**

Regional and value based care program filters enable you to better prioritize underperforming or higher risk areas.

**Easy Sharing & Reporting**

Export as a .pdf, .xls, .csv or .ppt file for distribution to other members of your organization.

Accessible Anytime

Data Refreshed Weekly

Clear Visualizations

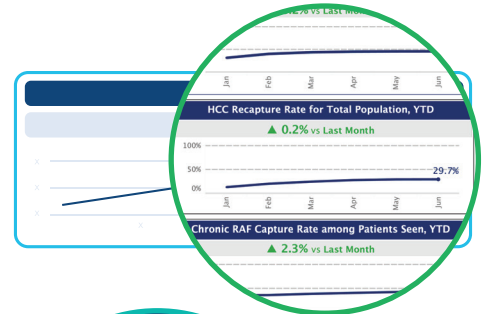

Find It on the Client Portal or Learn More: [curationhealth.co/analytics-reporting](http://curationhealth.co/analytics-reporting)

Track the risk adjustment performance of your value-based care programs anytime, anywhere, at any level of granularity you desire. No tracking back through past reports, no last-minute requests of your CSM—simply log in to your client portal to access all your most important data.

**DIG INTO THE DATA WITH INTUITIVE DASHBOARDS**

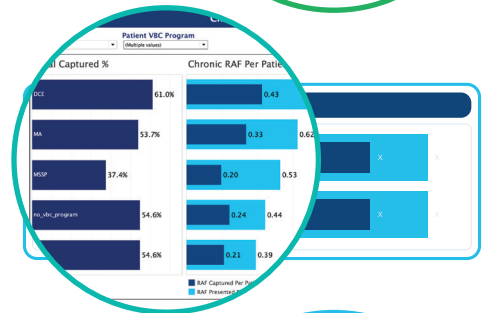

► **Trended Metrics**

Get a YTD snapshot of key performance indicators, including patients seen, HCC capture and recapture rates.

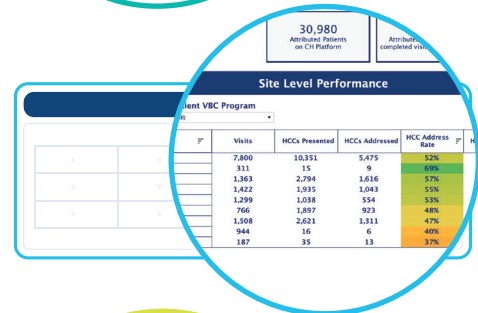

► **Chronic RAF Metrics**

Compare the clinical complexity of populations by looking at the points of chronic RAF being captured, filterable by region, grouped by VBC program.

► **Site Level Performance**

Analyze performance from practice to practice by comparing HCCs presented, addressed and captured.

► **Provider Level Performance**

View and compare the rates at which individual providers are addressing, capturing and recapturing HCCs.
